

# 1800 Sound Performance

**Summary:**

We chart the decibels for various CellarPro 1800 Series and Breezaire WKC series cooling units as measured when installed in a Le Cache Model 2400 wine cabinet (left) and in a wine cellar wall (right).

### Test Conditions:

- The readings on the left were measured when the wine cooling unit was installed in a Le Cache Model 2400 wine cabinet, placed flush against a wall in a carpeted room with 8-foot ceilings. The readings were taken 3 feet in front of the wine cabinet at a height of 5 feet.
- The readings on the right were measured when the wine cooling unit was installed in a wine cellar wall, in a non-carpeted room with vaulted ceilings. The readings were taken 3 feet behind the wine cellar at a height of 5 feet.

(1) Actual results may vary depending on your individual acoustic conditions and environment.
